- **Contract value of € 72 million**
- **Dam to secure water supply**

Nairobi/Vienna, 7 August 2017 STRABAG, the publicly listed technology group for construction services, has been commissioned to build the Thiba Dam in Kenya, which will help secure the year-round water supply for the country's agriculture. "The 40 m tall and 1 km long dam being built about 130 km northeast of the Kenyan capital of Nairobi will create a reservoir that will allow a second harvest every year in the surrounding cultivable area," explains Thomas Birtel, CEO of STRABAG SE.

The contract value translates to the equivalent of approximately € 72 million and also includes the connection to the existing road network as well as facilities for water draw-off and safe floodwater drainage. The construction for the project, being carried out largely through international financing, is scheduled to last around 45 months. The contractual start of construction is expected to take place in early October 2017 latest.

***STRABAG SE** is a European-based technology group for construction services, a leader in innovation and financial strength. Our services span all areas of the construction industry and cover the entire construction value chain. We create added value for our clients by our specialised entities integrating the most diverse services and assuming responsibility for them. We bring together people, materials and machinery at the right place and at the right time in order to realise even complex construction projects – on schedule, of the highest quality and at the best price. The hard work and dedication of our close to 72,000 employees allow us to generate an annual output volume of about € 14 billion. At the same time, a dense network of numerous subsidiaries in many European countries and on other continents is helping to expand our area of operation far beyond the borders of Austria and Germany.
